DEMAC
INDIA'S WPC EXPERT

USER RECOMMENDATIONS

Adhesive :

For optimal bonding, use high-quality water- or solvent-based adhesives on wooden substrates. Use of Hetex adhesive is not recommended.

Bending:

Engineered for flexibility, Advance WPC laminates can be precision-bent up to 90° using a U-groove cutter.

Cutting & Machining:

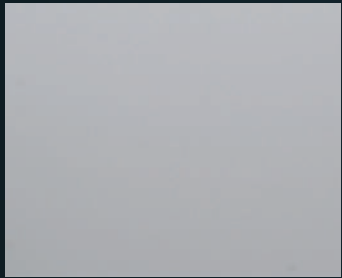

Designed for effortless fabrication, the laminates can be cut with diamond-tipped blades and smoothly routed or drilled using standard woodworking equipment.

Maintenance:

Maintain the surface with a mild cleaning solution and a soft cotton cloth to preserve its finish. Prolonged exposure to direct sunlight should be avoided to ensure lasting performance.
